Subject: Re: Solar renewable energy guidance

Thanks for speaking with me earlier, Justin.

Can you send me copies of complaints the AG's office has received re solar marketing practices?

And just double-checking - you said the AG's office issued the guidance you sent, but did not take any enforcement actions against anyone. And that was because it didn't seem like there was one particular company that needed to be singled out, but did the AG's office officially determine that none of the company's had violated any consumer protection laws?

Thanks, Elizabeth
